

Single-mode optical variable attenuator

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.

DiCon's MEMS variable optical attenuator is a high quality VOA based on DiCon's industry proven MEMS mirror technology. These operate by collecting and collimating light from an input fiber and ...

Thorlabs has a wide variety of single mode (SM), polarization-maintaining (PM), or multimode (MM) fixed and variable optical attenuators (VOAs). We offer SM and PM electronic VOAs that provide control of ...

Intended for field testing during installation, new equipment turn-ups, or routine maintenance, the SVA1 is a complete, easy to use attenuator. Its unique features allow bidirectional signal transmission with ...

Optical Network International Single Mode Manual Variable Optical Attenuator (MVOA) Features High precision Wide attenuation range Low Insertion Loss Compact size

Optimized for use with EXFO systems and software, the MOA-3800 Variable Optical Attenuator (VOA) can add precise attenuation to four, eight or sixteen different singlemode or multimode fibers (each ...

We offer the industry's most extensive selection of fiber variable optical attenuators (VOAs), addressing all application scenarios with best-in-class performance and value.

We offer a high performance handheld instrument with excellent overall specifications, and automation features that are useful in either stand-alone or computer controlled situations, or an inexpensive in ...

These VOAs are designed for use with optical fiber that is single mode within the operating range. Please see the Specs tab for information on the single mode fibers integrated into each model. ...
