

Smart connects to industrial Ethernet switches

They provide reliable, high-speed data transmission for industrial networks, including 10G industrial switches for faster speeds. Rugged enclosures are available with IP30, IP40, or higher-level ...

With high-speed 10-GE uplinks, high-wattage PoE options, ultra-low jitter, advanced network security features, and device-to-cloud performance monitoring with the Cisco ThousandEyes agent, these ...

EtherWAN delivers industrial-grade Ethernet solutions including managed switches, media converters, and rugged network devices designed for harsh environments. Trusted by smart transportation, ...

Smart services enable the customer to minimise facility downtimes. Connectors with extra functionality can not only receive data, but can also process and forward data to other systems.

With the Ethernet-APL field switches, sensors are integrated into the Ethernet network via a two-wire Ethernet connection. Data from the field level is available immediately. Industrial unmanaged ...

The Allen-Bradley® Stratix® 5200 managed industrial Ethernet switch offers a versatile design supporting various copper and fiber models with Layer 2 switching.

Industrial Ethernet Switches from AutomationDirect. Your source for industrial unmanaged and managed switches and ethernet accessories.

In today's connected, data-driven factories, Industrial Ethernet switches are essential for smooth data flow and real-time performance. These switches connect programmable logic controllers...

EtherWAN delivers industrial-grade Ethernet solutions including managed switches, media converters, and rugged network devices designed for harsh environments. ...

Our switches are built for high network flexibility, cyber security and durability and are suitable for use in mission-critical environments.

In today's connected, data-driven factories, Industrial Ethernet switches are essential for smooth data flow and real-time performance. These ...

Moxa's super-slim SDS-3000/G3000 Series industrial smart switches are the perfect balance between simplicity and the essential functionality industrial automation engineers need to configure, monitor, ...
