

Swedish Intelligent Cold Aisle Low-Loss Installation Solution

The Cold & Hot Aisle Containment system is retrofittable - making it ideal for improving the performance of older server rooms facing upgrades. It's also modular and scalable, which helps future-proof ...

Thanks to the specially designed fixing and flexible plastic isolation elements, the hot aisle chimney can easily be levelled and installed on top of the cabinets ensuring a flexible containment and airflow ...

Key segments include in-row containment, which integrates closely with server racks, and full-scale aisle containment, which is standard in large-scale facilities. The choice of solution ...

Inexpensively supports capacity increases by separating hot and cold air for increased efficiency. Flexible platform for easy configuration: Full-depth DCF rack maximize space utilization and allows ...

Discover how hot and cold aisle containment improves cooling efficiency, cuts energy costs, and supports uptime in modern data centres.

A cost and energy efficient aisle containment solution that will keep your data center investment working longer. Major savings can be made by separating and circulating the hot and cold air flows.

The Elevate cold aisle automatic active opening roof skylight is designed to allow a modular approach to the construction of an aisle containment solution with a central closed roof.

Simple, fully integrated infrastructure - Racks, precision cooling, monitoring, cable management and power systems designed to work together, saving you time and money on installation and operation. ...

In order to efficiently ensure the necessary cooling, Rittal has developed three cooling variants for aisle containment. Two solutions use containment of the cold aisle, while the third is based on hot aisle ...

Get expert hot and cold aisle containment solutions for your data centres with Ardmac. Our tailored approach maximises efficiency.
