

Tonnage of optical module die-casting machine

We offer a wide range of products to meet our customer's needs; with Die locking forces from 784kN (80 tons) to over 39,200kN (4000tons) for various alloys; aluminum, zinc, and magnesium casting.

Shine-Choose operates a full range of horizontal cold-chamber aluminum die casting machines: 280T, 300T, 400T, 420T, 580T, 900T, 1250T, covering part weights from a few grams to ...

This document discusses how to calculate the machine tonnage required for high ...

2024-09-26 1.Casting information casting name: optical module casting requirement: surface requirements casting process: Die Casting machine tonnage:250 alloy material:High heat transfer ...

Based on the know-how obtained from tours of many customers domestic and international, the conventional die-locking rigidity was changed and the new die-locking system that enables high ...

As for the tonnage of the die-casting machine, it is related to the total projected area of the die-casting part (including the projected area of the die-casting part, slag bag, cross runner, sprue and cake), it ...

This document discusses how to calculate the machine tonnage required for high-pressure die casting parts. It explains that the tonnage is based on three factors: die clamping force, fill ratio, and mold size.

Energy saving servo pump with "Idling Stop" & "rotational speed control" features as standard and achieves significant energy saving. Information on UBE Machinery's UB-iV Series die casting machines.

Learn how to scientifically select die casting machine tonnage through accurate clamping force calculation, shot system matching, mold compatibility checks, and energy cost evaluation to ...

Technical procurement often treats machine size as a simple checkbox, yet the audit of die casting machine tonnage requires a forensic understanding of Pascal's Law. The pressure of the ...

The tonnage refers to the clamping force exerted by the machine to hold the die closed during the casting process. Here's a general method to calculate the tonnage of an HPDC machine:

Tonnage of optical module die-casting machine
