

# Twosix optical module

Learn how Two Six Technologies products solve the world's most complex challenges.

For more than 15 years since we began handling optical communication in 2003, our highly specialized engineers and experienced sales staff have been consistently providing everything from proposing ...

Latest news and updates from Two Six Technologies, including announcements, innovations, and company insights.

We will solve your problems by introducing optical transceivers adopted by the world's major switch vendors at competitive prices! We will provide a free estimate for the cost of introducing optical ...

Silicon photonics-based 1.6T-DR8 transceiver module using a Marvell® Ara 3 nm optical digital signal processor (DSP), featuring 200 Gbps electrical and optical interfaces.

Explore Two Six Technologies' library of on-demand resources to give you the extra support you need.

View the TI Optical module block diagram, product recommendations, reference designs and start designing.

Pluggable optical transceiver modules are essential components in data communication systems, widely used as optical interconnects at the termination of fiber optic links. These modules perform the ...

At Two Six Technologies, you'll collaborate with top scientists, developers, and engineers to make a real impact. Enjoy an unbeatable culture. Reach your fullest potential.

Object-level encryption to protect sensitive data at scale in the cloud, on-premise, or hybrid environments. Reliable access and communication for vulnerable and hard-to-reach ...
