

West Africa's first fiber optic communication line

French Telecoms Company - Orange, at AfriTech Festival International Trade Fair, announced the launch of Djoliba, a tech infrastructure that is based primarily on 10,000km of ...

Djoliba marks the first pan-West African network and will simplify the process of providing services across country borders, Orange said. Previously, telecommunications networks in the area ...

Google has announced a landmark infrastructure project: Umoja, the first-ever fiber optic cable directly connecting Africa and Australia. Umoja, which means "unity" in Swahili, signifies a new ...

The end of 2020 coincides with the commissioning of the first African fibre optic backbone, a result of bringing together terrestrial and submarine cable infrastructures. With the ...

In 2011, Phase3 were building the West Africa One network, an aerial optic fibre transmission system which runs from Nigeria to Benin and Togo.

Most of Africa's cables are maintained at sea by the remarkable crew of the ship Léon Thévenin. I joined them in late 2023 during a repair operation off the coast of Ghana.

Since putting our first fibre in the ground in 2009, our high-speed cross-border network has grown to over 110,000km of fibre. It is the continent's largest independently owned network, offering ...

We are the first state to manufacture fibre optic cable in Nigeria. Let me say that what we are witnessing today is another example of numerous developments happening in different parts of ...

Dubbed Umoja Fiber, the cable will be anchored in Kenya and will pass through Uganda, Rwanda, the Democratic Republic of the Congo, Zambia, Zimbabwe, and South Africa, including the ...
